# Uriel Sinue Vejero León

Full Stack Developer

I have three years of experience working with APIs, microservices, and cloud technologies. I have hands-on experience with stacks such as Python, Node.js, React, JavaScript, Django REST Framework, and both relational and non-relational databases. Throughout my professional journey, I have successfully developed and implemented various projects leveraging these technologies. I am adept at designing and integrating scalable solutions, ensuring optimal performance and seamless functionality. My experience in this domain has allowed me to develop a strong problem-solving mindset and a deep understanding of modern software development practices.
